

Headless 360: The Platform You Trust, Everywhere.

Opening the MCP Server to every surface.

Everything that makes Salesforce the enterprise standard — backend power, open API platform, Agentic Layer, and security — is now exposed via open API.

**Security Layer
Profiles/Perms**

**MCP Server
Foundation**

**Agentic Layer
Integrity**

The foundation doesn't change. The front door does.

So What is New?

The Shift from DIY to Platform-Native!

You've been hacking headless with the CLI and local MCP servers.
Headless 360 takes those experiments and wraps them in the Salesforce Trust Layer — making them production-ready at enterprise scale.

MCP Servers

CRM Kits
Hosted MCP Server
Salesforce DX MCP Server
Data Cloud Kits

Experience Layer

Interactive Cards
Dynamic Forms
React / Multi-Framework avail

Agentic Observability

Session Tracing
Testing Center
Agent Script

We're Not Killing the UI

A new door, not a closed one.

***"Why should you ever log into Salesforce again?.....
Maybe you never will."***

— Parker Harris

Some users want a conversational AI interface. Some want traditional UI. We are building both.

- Active Lightning UI Roadmap
- MCP Client coming soon to Agentforce
- Continuous Cloud Updates and Enhancements

Headless 360 is a new door — it doesn't close the old one.

Slack: The Ultimate Agent Orchestrator

Your AI Command Center.

*"Pull me a summary of all at-risk deals this quarter and create follow-up tasks."
"Find me all of my Sev 1 cases that have been open for over a week"*

Grounded in your Truth

Full data governance across Headless 360, Agentforce, Jira, Slack Messages and more!.

Natural Language

The ChatGPT experience for your org — governed by your specific rules and permissions.

Natural language in. Cross-platform action out. Real permissions. Real audit trail.

What if you don't have Slack?

Flexibility without compromise.

The underlying data and structure stay consistent regardless of how you access it.

Agentforce Vibes

Build custom React apps inside the Salesforce environment using pro-code tools.

Agentic AI Tools

Native connections that bring Headless 360 power directly into your agentic AI tools like Claude or Cursor.

Custom Surfaces

Build your own bespoke interfaces on our secure MCP foundation.

The channel is your choice. The power is the same.

The Developer Story

AI-native builders. Enterprise-grade scale.

We aren't replacing developers — we're giving them superpowers. Claude and Cursor now connect directly to the heart of Salesforce.

Build with AI

Accelerate Apex, Flow, and Metadata creation with Vibes/Claude/Cursor.

Deploy to Platform

Class test creation and security before deployment all agnified

Expose to Users

Natural language triggers — end users just ask, the platform acts.

Both Sides of the Coin

More options, not fewer.

Salesforce is the only platform that can credibly play both sides — AI-native and traditional UI — without forcing a choice.

USER LICENSES

TRUST LAYER

Always On

Headless 360

AI-native • Conversational
Cross-platform • MCP-open

OR

Lightning Salesforce UI

Lightning • Screen Flows
Record Updates • Dashboards

Protect what you love. Embrace what's next.

The Developer Story

AI-native builders. Enterprise-grade scale.

We aren't replacing developers — we're giving them superpowers. Claude and Cursor now connect directly to the heart of Salesforce.

Build with AI

Accelerate Apex, Flow, and Metadata creation with Vibes/Claude/Cursor.

Deploy to Platform

Class test creation and security before deployment all agentified

Expose to Users

Natural language triggers — end users just ask, the platform acts.

// Agentforce Action Definition

```
exposing Headless360.MCP_Server {  
  trigger: 'natural_language',  
  context: 'permissions_enforced',  
  logic: 'deterministic_actions'  
}
```

Build with AI. Deploy to the platform. Expose to users naturally.
